Graph Exam Questions

1. Sketch the following functions on the set of axes below:

a. $x^2 + y^2 = 25$

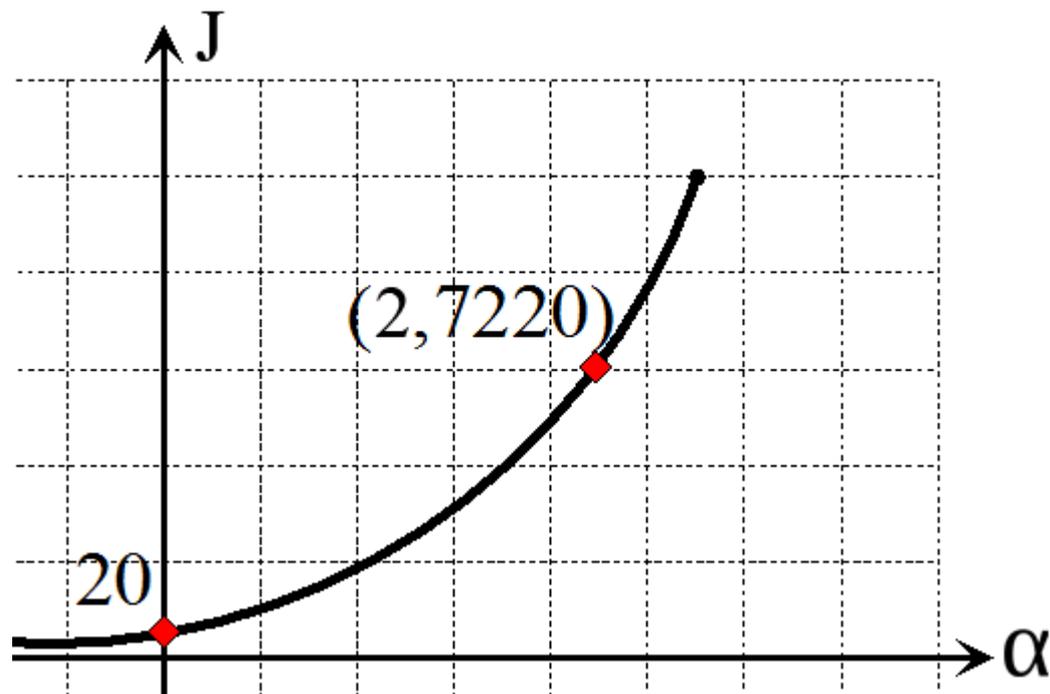

b. $y = 3x + 4$

a. Use the Graph to estimate the solutions to the pair of simultaneous equations above.

(8 Marks)

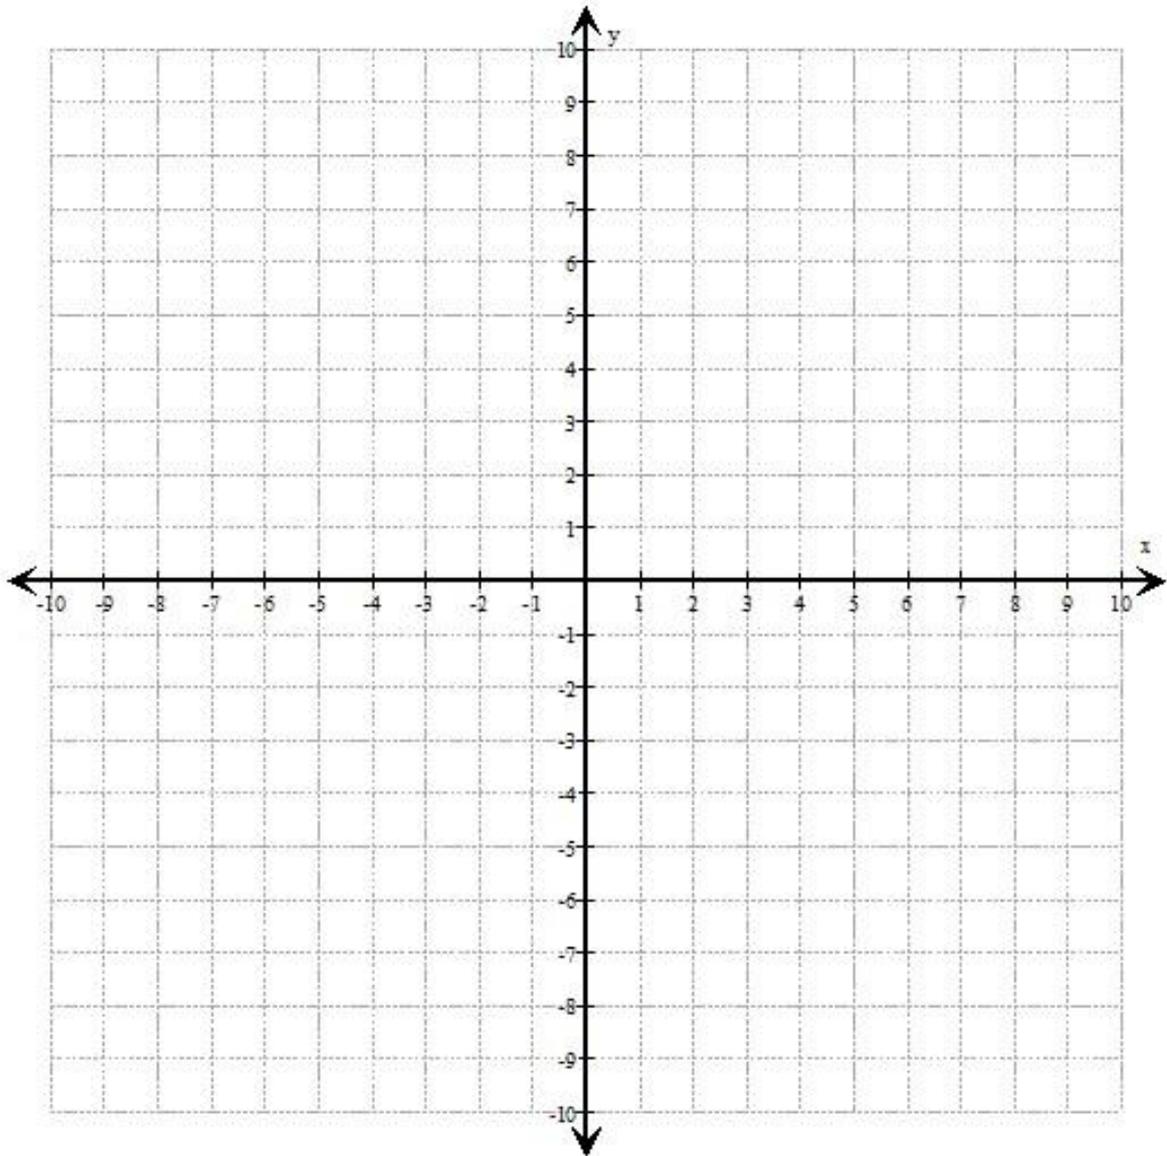

2. The graph of $J = NP^{\alpha}$ is plotted below.

Given that N and P are positive constants, find the values of N and P .

(4 Marks)

3. Use the axes below to help you answer the following questions:

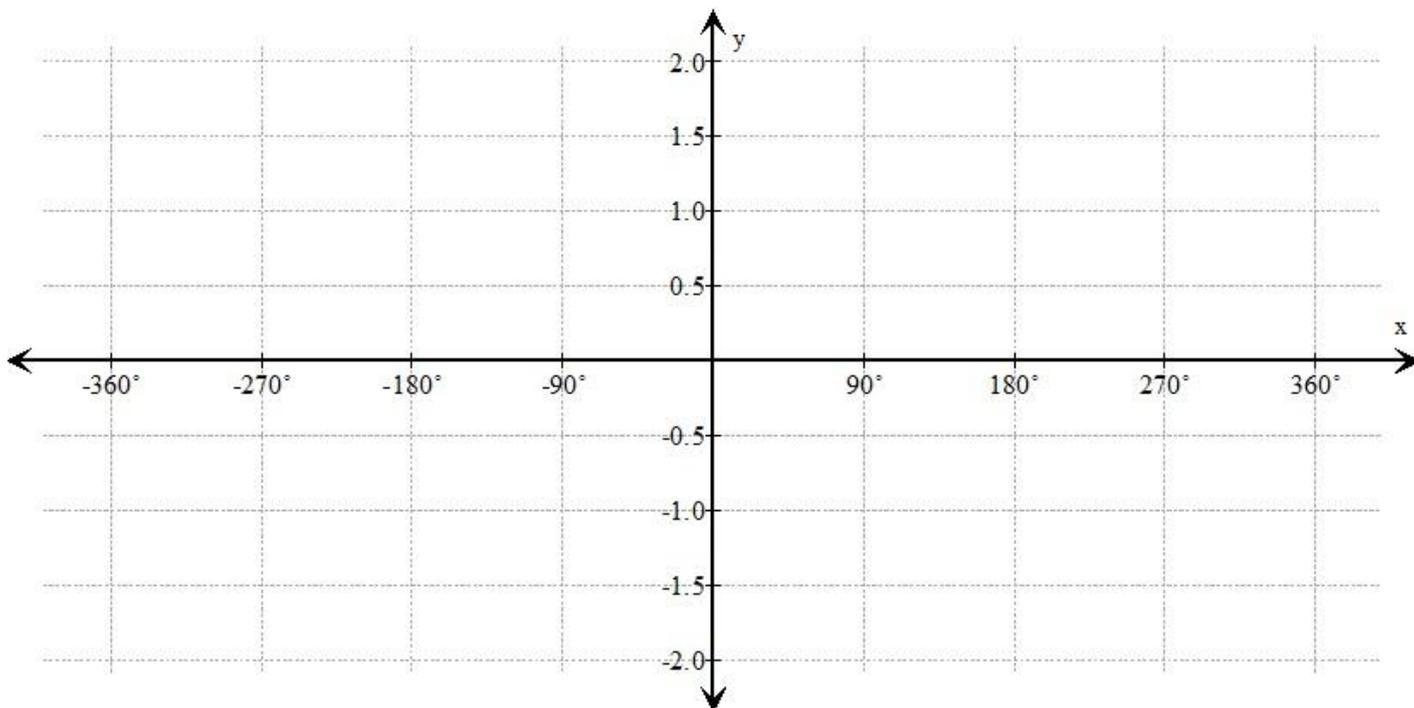

- Plot the graph of $y = 2x^2 - x$.
- Use your plot to estimate the solution(s) to $2x^2 - x = 5$.
- Write down the equation of the line you would need to draw on the axes to estimate the solution(s) to $2x^2 - 4x - 1 = 0$.

(6 Marks)

4. Use the axes below to help you answer the following questions:

a. Plot the graph of $y = 2 \sin(x)$ for $x - 360^\circ < x < 360^\circ$.

b. Use the graph from part (a) to estimate the solution(s) to $2 \sin(x) = 1.5$ for x values between 0° and 360° .

(5 marks)
